Solutions for data center, virtualized and cloud environments.
More Data = More Challenges

As the explosion of data continues, organizations face intensified security risks, a logistical and administrative nightmare, skyrocketing IT expenses and the cumbersome challenge to safely share information with partners.

What’s more, the majority of business data is unstructured and contains vast amounts of sensitive information that requires protection. No easy task for organizations piecing together point solutions and struggling across platforms.

Gain the Confidence You Need

**Manage the explosive growth of data.** PKWARE is the only provider of critical components for data reduction to control sprawl while securing, moving, and storing data across the extended enterprise, both internally and externally. The PKWARE Solution provides a data container that moves very large datasets, protecting the data and reducing the logistical and administrative burdens of data handling.

**Secure data.** PKWARE ensures protection with persistent file-level security independent of system, application or data format, “at rest” or “in motion”. The PKWARE Solutions render data unusable to anyone that does not have the key to decrypt it and ensures data integrity even when lost or stolen.

**Utilize the cloud.** With the PKWARE Solution, you will maximize your cloud strategy by reducing data storage costs while at the same time securing data that is transmitted to and stored within cloud environments.
PKWARE offers software solutions to critical IT problems, namely the explosive growth of data, the need to secure data and the emergence of the cloud. PKWARE offers the only total cross-platform solution for reducing and securing data in motion or at rest, so data can be securely moved or stored anywhere, regardless of the computing environment – inside or outside of the enterprise, and in private, hybrid or public clouds.

**REAL BUSINESS BENEFITS**
PKWARE is the only complete solution for reducing, securing, moving and storing data across the extended enterprise to deliver these benefits:

- **Cost Reduction.** With a reduction in data size of up to 95%, more data is transmitted without increased bandwidth or the burden and costs associated with additional storage uptake.

- **Service Delivery.** Consistently achieve service level agreements by significantly reducing elapsed time in processing and transporting large amounts of data.

- **Manage Risk.** Avoid the costs associated with data security breaches while achieving compliance with industry-driven regulations, through the use of data-centric security.
Trusted and Proven by over 30,000 Companies across the Globe

More than 30,000 global enterprises use the PKWARE Solution billions of times a day.

Organizations trust PKWARE to manage risks associated with data security breaches and reduce storage costs through data reduction, including:

✔ 90% of Fortune 100 companies
✔ 24 of the top 25 global banks and financial institutions
✔ 200 government agencies and ministries

Some of the world’s leading organizations trust PKWARE with not only their data, but their reputation as well.
