

WHAT ANALYSTS ARE SAYING ABOUT PKWARE

With more than thirty years of experience in data protection, PKWARE has earned a reputation for developing high-performance technology that solves challenges no other vendors can address. Industry analysts continue to recognize PKWARE as a leading provider of data protection solutions. Here's a quick look at some of the reasons why.

PKWARE HAS UNMATCHED CAPABILITIES

Large, complex organizations need a data protection solution that works across multiple platforms and operating systems. No other data security vendor can match PKWARE's ability to protect data on every enterprise operating system – mainframes, servers, desktops, mobile devices, and more.

"PKWARE's Smartcrypt is the only data protection platform that keeps information secure across the entire organization. From mobile devices to mainframes, it protects sensitive data from internal and external threats."

- NUCLEUS RESEARCH, APRIL 2018

"PKWARE possesses two differentiating features: the ability to scan data in real-time, which greatly reduces the amount of time to complete a scan; and the combination of data discovery and redaction in a single offering."

- 451 RESEARCH, AUGUST 2019

PKWARE KNOWS ENCRYPTION

Encryption is the strongest form of data protection, but it has to be implemented the right way. PKWARE has been delivering enterprise-class encryption solutions for decades, and analysts have recognized our deep expertise.

CUSTOMERS PREFER PKWARE'S APPROACH

Financial institutions, global retailers, government agencies, and other organizations continue to adopt PKWARE's data-centric security solutions. PKWARE's automated workflows, simplified administration, and unmatched capabilities allow even the most complex organizations to meet their data protection goals.

"In speaking with end users, Nucleus found that deployments of PKWARE are fast and require few internal resources."
