

SECURE DATA EXCHANGE IN BANKING & FINANCIAL SERVICES WITH SMARTCRYPT

Whether you're handling settlement, customer master, or general ledger files, your organization needs to exchange huge amounts of sensitive information. Despite the volume of data, you must ensure that the information is protecting according to internal policies and industry mandates.

You need a solution that can address multiple security requirements with your IT budget constraints in mind.

Secure sensitive information and reduce costs

By protecting and compressing data, Smartcrypt helps banking and financial services companies tackle the challenge of increasing volumes of data. Sensitive information is secure. Spending is reduced.

Your Unique Challenges

Non-compliance results in considerable fines and penalties – over \$200 per stolen record, averaging over \$6.5 million per data breach.

Implementing strong data security is getting increasingly more expensive and complex.

Protecting and maintaining control of data requires a comprehensive solution for audit and recovery.

Our Unique Solutions

Smartcrypt provides end-to-end protection. It strongly encrypts data in files and databases, helping firms meet compliance requirements, eliminating the risk of fees and penalties.

Smartcrypt eliminates the need for encryption point solutions. It supports a wide range of key types and interfaces including its own "Smartkeys" as well as X.509 digital certificates, PGP keys and traditional passphrases.

Smartcrypt's policy controlled approach allows you to retain access to data across your organization for internal/ external audit and eDiscovery. It also allows DLP and Anti-malware engines to decrypt and scan protected content.

Your Unique Challenges

Retaining insight and visibility into which users and systems are handling your sensitive information

Volumes of data keep growing. However, efficient data transfer can't be sacrificed.

Our Unique Solutions

Smartcrypt audits all security operations on your sensitive files reporting this information into the Smartcrypt Manager's dashboard and reports as well as your enterprise SIEM solution.

Smartcrypt compresses before it encrypts reducing file size up to 90%. This results in huge storage savings and faster transfer times for protected data in motion.

Smartcrypt at a glance

Exceed compliance requirements.

Ensure PII & other sensitive data remains protected at rest and in exchange to meet government mandates and industry regulations.

Securely signed, sealed, and delivered.

Encrypt files using Smartkeys, X.509 digital certificates, PGP keys and passphrases. Ensure data integrity with digital signatures.

Reduce IT infrastructure costs.

Reducing file size up to 90% accelerates transmission times and improves processing efficiency, lowering costs.

Eliminate conversion costs of multi-platform data exchange.

Smartcrypt works across all major enterprise computing platforms including Windows, Linux, AIX, HP-UX, Solaris, IBM i, IBM z Systems, iOS and Android.

Exchange data securely with external partners.

Extend your security policies without added infrastructure costs for you or your partners.
